Introduction

Google Map integration with Odoo

Pragmatic has developed module which provides the integration between Google map and Odoo.

Advantages:-

- Shows the customer address on google map with pinpoint on Customer form in Odoo.
- Shows the route between login user address and partner address on Sales Order form
- Shows the route between login user address and partner address on delivery order form
- Autocomplete address / Suggestion.

After installation of this module, you will have to configure the google api key at below path.

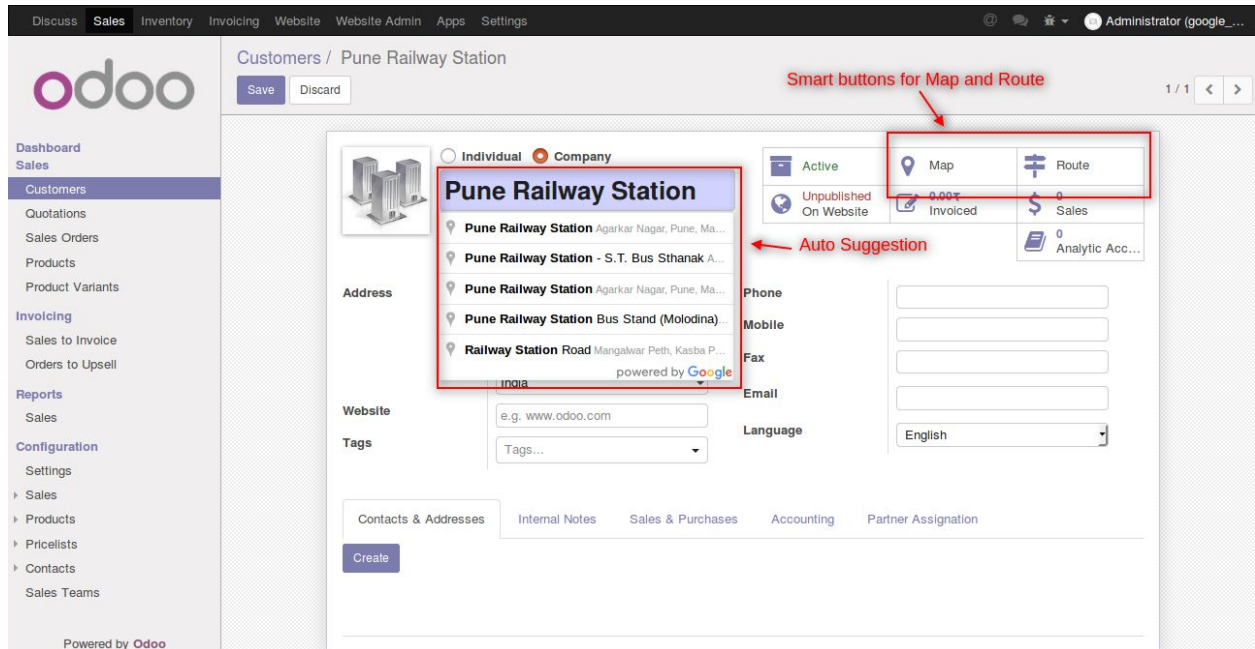

Path : Website Admin → Settings → Google Maps.

The screenshot shows the Odoo Website Admin interface. The top navigation bar includes links for Discuss, Sales, Inventory, Invoicing, Website, Website Admin, Apps, and Settings. The left sidebar shows the Odoo logo and navigation options: Dashboard, Configuration, and Settings. The main content area is titled 'Domain' and contains several configuration sections. The 'Google Maps' section is highlighted with a red box, and a red arrow points to the 'API Key' field with the text 'You need to set the Google Map API Key here.' The 'Google Maps' section includes a 'Follow the instructions to create your key.' link, an 'API Key' input field, a 'Google Maps Theme' dropdown menu set to 'Default', and a 'Google Maps Localization' section with a link to 'Visit the page about Localizing the Map', a 'Language' dropdown menu, and a 'Region' dropdown menu. Below the 'Google Maps' section are the 'Language' and 'Social Media' sections. The 'Language' section includes a 'Languages' list with 'English' checked, a 'Default Language' dropdown menu set to 'English', and a 'New Language' button labeled 'Install a language'. The 'Social Media' section includes input fields for 'Twitter Account', 'Facebook Account', and 'GitHub Account'.

After placing the google map api key, you will be able to see the google map in Odoo.

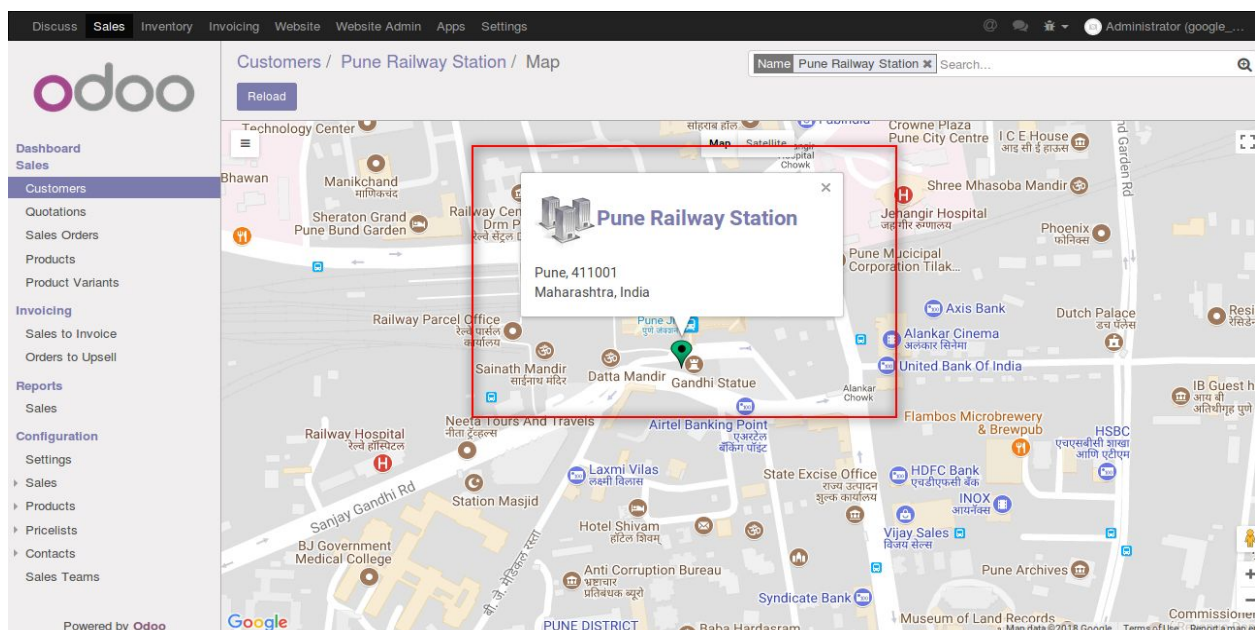

Partner Form

In Odoo, on the partner form, you will see two smart buttons, one is **Map** and another is **Route**. When user types customer name, system will auto suggest the partner name and address. Please see the below screenshot.

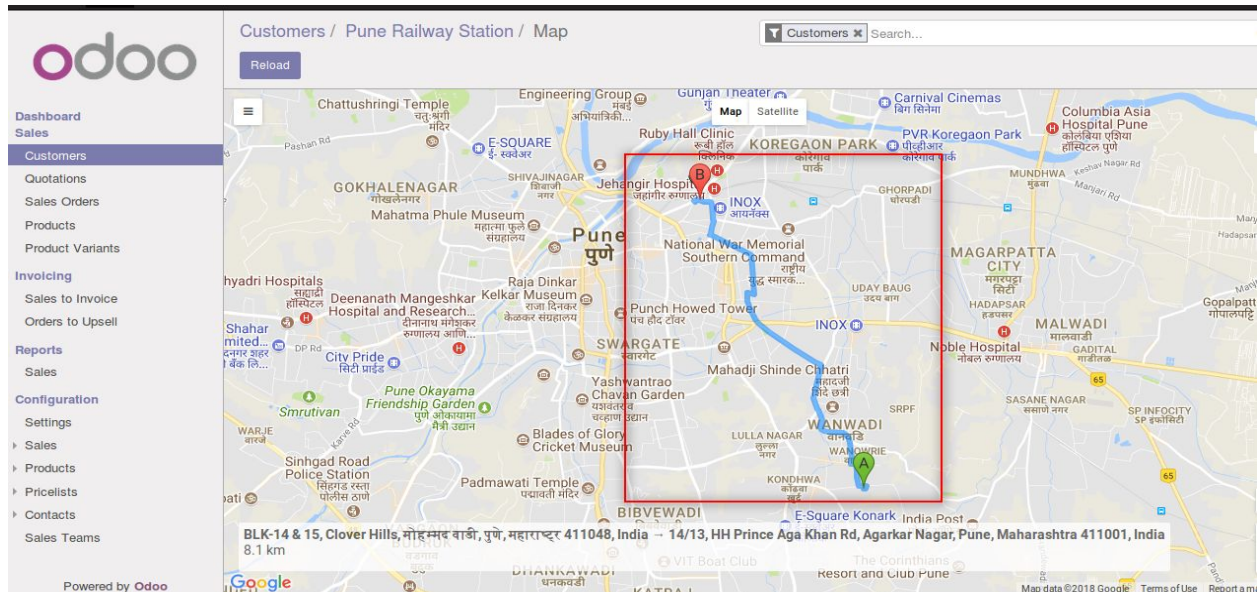

Map

When user clicks on Map smart button, it will open the map with pinpoint. Please see below screenshot which show the partner/customer location on google map.

Route

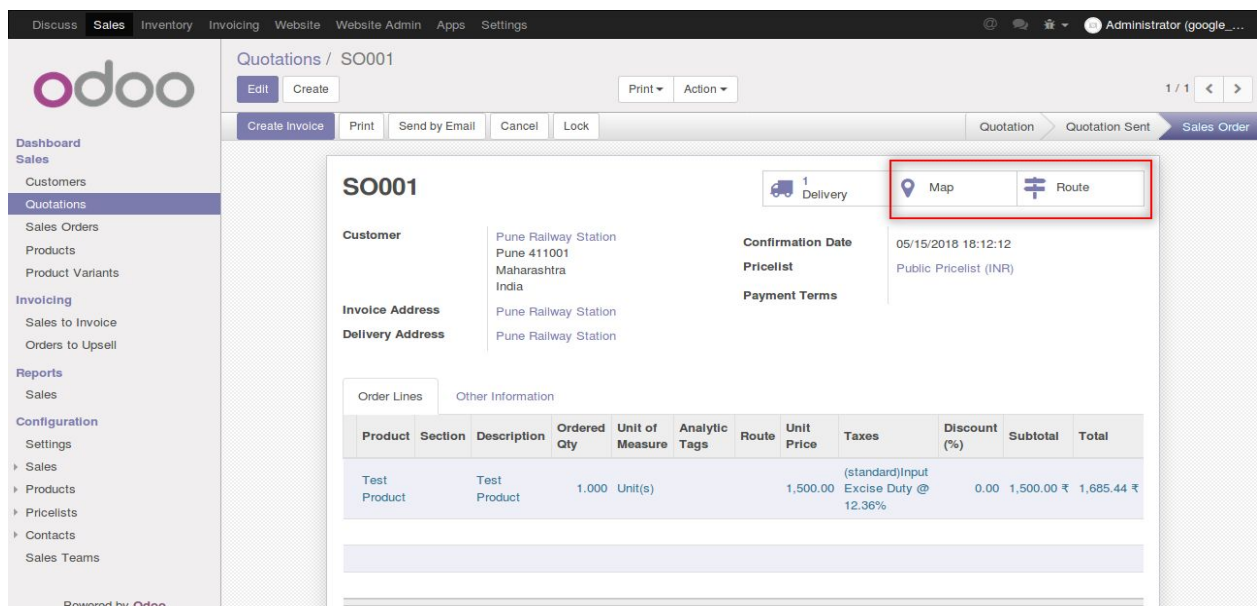

When user clicks on Route smart button, system will open google map with logged in user location and customer location. Please see below screenshot.

This module provides facility for see the map and route on sales order form and delivery order form.

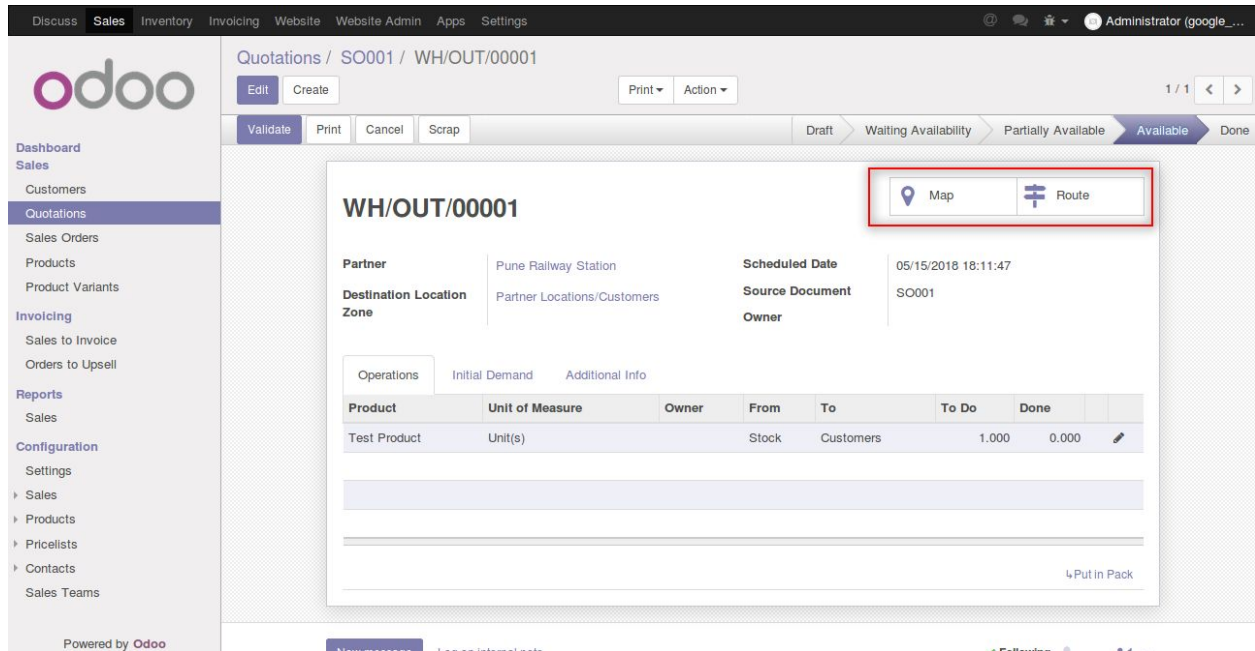

Sales Order

This is sales order form with two smart buttons. It will pick the delivery address from the sales order.

Delivery Order

This is delivery order form with two smart buttons. It will pick the partner address which there on this (DO) form.

The screenshot shows the Odoo web interface for a Delivery Order (WH/OUT/00001). The top navigation bar includes links for Discuss, Sales, Inventory, Invoicing, Website, Website Admin, Apps, and Settings. The user is logged in as Administrator. The left sidebar contains a menu with categories like Dashboard, Sales, Customers, Quotations, Sales Orders, Products, Product Variants, Invoicing, Reports, and Configuration. The main content area displays the Delivery Order form. At the top, there are buttons for Edit, Create, Print, and Action. Below these are status buttons: Validate, Print, Cancel, Scrap, Draft, Waiting Availability, Partially Available, Available, and Done. The form title is WH/OUT/00001. It includes fields for Partner (Pune Railway Station), Destination Location (Partner Locations/Customers), Scheduled Date (05/15/2018 18:11:47), Source Document (SO001), and Owner. There are also tabs for Operations, Initial Demand, and Additional Info. A table lists the products and their quantities. The bottom of the form has a 'Put in Pack' button.
